

ALBION-SHERIDAN TOWNSHIP LANDFILL  
LIST OF THINGS TO DO

JULY 6, 1992

Maintain a record of terrestrial animals observed on-site during field investigations.

- \* 1. Review drilling specs, especially Liz's estimated quantities and breakdown on bid sheets. noon
- Thurs 2. Coordinate with surveyor to make sure he establishes permanent benchmarks when conducting aerial control survey.
- " 3. Select and stake benchmark location at base of south side of railroad tracks (railroad is south of Erie Road).
- " 4. Select and stake staff gauge locations in North Branch of Kalamazoo River (should Jim or Glen be involved?).
5. Construct EM-31 boom for Charlene. (before Aug. 1)
6. Select and stake landfill subsidence monument locations. 8-12 hr. (Geophysics OH) ask Mike
7. Establish field support facilities including identifying, obtaining and mobilizing equipment and materials as outlined in Section 2.5.1 of the Work Plan.
8. Obtain approval to copy ASTM methods referenced in the project plans. any time - OK w/ Scott before or on Friday
- \* 9. Locate source of supply for drilling water. — Mike, how do we get water to site for sampling?
10. Sample and analyze water source (sample from drillers water tank if possible).
11. Arrange for disposal of decon, development, and purging water. — Will
12. Arrange for roll-off boxes and water collection tanks for support area. — Will
13. Get phone number for local weather service and layout form for collecting weather data on a daily basis (data to include ambient temperature, barometric pressure, and wind speed & directions). CK weather data agent or quapp
- Library 14. Review data collected as part of investigations at nearby contaminated sites (such as Brooks Foundry & McGraw-Edison) to see if data is available for nearby residential wells.

US EPA RECORDS CENTER REGION 5

471095

15. Obtain analytical data for 2 supply wells for Amberton Subdivison (east of site).

16. Review reports on nearby sites to determine if pumping test data is available for both aquifers.

17. Maintain a record of terrestrial animals observed on-site during field investigations.

18. Make up daily drilling sheets to be used by WWES and drilling subcontractor to record daily drilling expenses incurred.

19. Bottles - Kurt Osterman

20. Verify route to hospital

21. Draeger tubes.
